PROFILE

A software engineer with hands-on experience in full stack web and mobile development using MERN, Flutter and UI/UX. Worked as a junior software developer at Finito IoT Products and as a full stack developer in Simbotech Trading PLC, contributing to web applications and developing expertise in platforms like Frappe/ERPNext. Strong problem-solving skills, critical thinking, and project management abilities with a passion for leveraging technology to drive social impact.

EDUCATION

Bachelor of Software Engineering

Computing and Informatics Faculty, JIT | Jimma University

GPA: 3.30 / 4.0

High School Diploma

Addis Ketema Preparatory School

EUEE: 491 / 700

WORK EXPERIENCE

Simbotech Trading PLC

NOV 2024 - DEC 2025

Full Stack Developer

- Developed and maintained web applications using the Django framework and implemented user interfaces using React.js.
- Implemented and customized Frappe/ERPNext applications according to project requirements.
- Participated in code reviews, ensured best practices and maintained high standards for code quality.

Fineto IoT Products

FEB 2024 - SEP 2024

Junior Software Developer

- Worked extensively with Frappe/ERPNext to customize and implement business solutions for clients.
- Built WordPress-based websites for small businesses.
- Collaborated in full-stack projects involving database integration and RESTful API development.
